SUMMARY

Aspiring Back-End Developer with hands-on experience in building scalable web applications using RESTful API, React. Participated in a real-world company project applying modern software design principles and best practices. Strong in problem-solving, OOP and committed to continuous learning and team collaboration.

EDUCATION

University of Transport and Communication (UTC)   09/2021 - Present
Information Technology
English: B1

Technical Skills

- **Programming Languages**: C#, C/C++.
- **Frameworks/Libraries**: ASP.Net, Web API, Identity, Entity Framework Core .
- **Database Management Systems**: MS SQL Server, MySQL, Oracle.
- **Tools & Platforms**: Git, GitLab, Visual Studio, Postman.
- **Other**: Agile/Scrum, Basic HTML/CSS/ReactJS.

WORK EXPERIENCE

.Net Intern: Tecapro   02/2025 – 04/2025
- Participated in software development using ASP.NET Core , Entity Framework Core, Oracle and React.
- Implemented full-stack CRUD operations with input validation, developing React-based user interfaces and building RESTful APIs using clean architecture and CQRS.
- Used Git and GitLab to manage merge requests, handle conflicts, and follow Git workflow.

Project

Clothing Store
Developed a system to manage website and sale book.   09/2024 - 11/2024
- Main features: product catalog management, multirole login, process order and shipping.
- Technologies: ASP.Net Core MVC, Entity Framework, Razor Page, SQL Server.
- Role: Fullstack developer, design and implemented MVC architecture, created database scheme, and integrated authentication and authorization.
- Link: GitHub

Online Product Management System: SkyStore   11/2024 - 12/2024
Developed a system to manage website and sale product and process orders, payments.
- Main features: product management, multi-role login, process order, payment
- Technologies: ASP.Net Core API, Entity Framework, JWT, SQL Server.
- Role: Backend deverloper, designed and implemented CRUD APIs, database schema design, and authentication integration.
- Link: GitHub

Data Warehouse Management & Data Portal   03/2025 - 04/2025
Developed a data warehouse management system and an open data portal.
- Main features: warehouse data CRUD operations, portal interface for management.
- Role: Frontend developer, responsible for building user interface with ReactJS and integrating with backend CRUD APIs.
- Technologies: ASP.Net Core, React TypeScript, JWT, Oracle
